

A complex black and white maze with a single entrance and exit. The maze is composed of numerous interconnected paths and dead ends, forming a dense, intricate pattern. The entrance is located at the top center, and the exit is at the bottom center. The maze is designed to be challenging, with many potential paths that lead to dead ends. The overall shape is roughly rectangular, with the entrance and exit positioned at opposite ends. The maze is a single continuous path that winds through the entire area, with no other openings or exits. The lines are black on a white background, and the paths are of uniform width. The maze is a classic example of a single-path maze, where there is only one way through from the entrance to the exit. The complexity of the maze is high, with many turns and dead ends, making it a challenging puzzle for the solver. The maze is a single continuous path that winds through the entire area, with no other openings or exits. The lines are black on a white background, and the paths are of uniform width. The maze is a classic example of a single-path maze, where there is only one way through from the entrance to the exit. The complexity of the maze is high, with many turns and dead ends, making it a challenging puzzle for the solver.

20 by 20 orthogonal maze - Solution
